The unit injector is the single most important component for ensuring that each cylinder in the engine is supplied with the correct amount of fuel, at the correct pressure and at the exact right moment of the ignition phase. These features, in conjunction with the correct fuel spray angle from the injector-nozzle into the combustion chamber are required for the engine to reach its correct performance and emission levels at an optimum fuel consumption level. In other words, they enable the highest possible performance from the lowest possible amount of fuel with the minimum level of emissions.

Introducing the **Volvo Reman Unit Injector Promotion with 2 years fitted parts warranty**. Volvo Reman unit injectors offer exactly the same performance and lifespan as Volvo Genuine unit injectors, but at extra value with a lower price tag. All Volvo Reman unit injector components have gone through extensive tests and reworked to a like-new condition before delivery. No matter which Genuine Volvo Parts (Brand New or Reman) you choose, only by having it fitted in a Volvo authorised workshop by a certified Volvo technician can the best possible levels of service, uptime and efficiency be secured.

We only offer what's best for your trucks.
